International Journal of Emerging Trends in Science and Technology**A University Model Thesis on Globalization for Globalism**

Author

Dr. Rojukurthi Sudhakar Rao

Returning Scholar to self-directed Research in Graph Theory & Applied, India

ABSTRACT

Research for fulfilling the needs and expectations of Society at large , as a matter of fact , becomes Policy of Quality and Equality in thinking and activities of contemporary Researchers. One such area of Research with influence on a global scale is the Globalization for Globalism. The effects of recent monetary, security and economic developments all over the World in the name of Globalization have become significantly an important current area of research –interest. This Paper is a thrust in the direction of comprehending the World as a Product of Globalization gifted by the ideology of Globalism. The Author has visited Universities for doing Research on Globalization and collected models of the University formats for presentation of his Research Works on Globalization summarily . The result is this Paper and a byproduct within this Paper presented as the Zero-base Review of the Globalization Zeitgeist.

Key Words : *Globalism , Globalization , Ideology , Porter , Arjun , John Dewey Professor , Research.*

1. INTRODUCTION

At the outset, research-project on Globalization for Globalism dwells on Globalization in the academic arena. To make it accessible to outside world, i.e., people at large, researching would mean democratization of access of scholarly work, i.e., Science & Scholarship, for worldwide recognition as a goldmine glitter for insourcing practical benefit to mankind , possibly having in mind practical rather than theoretical work accruing out of it . Globalization for Globalism from which the humanity could benefit, is a key purpose of the research making it a practical science.

2. RATIONALE / RESEARCH HYPOTHESIS

The theory of Globalization satisfyingly precise and complete can be enlarged on a foundation of the technique of logical statements because it is the only one universal ‘ Entity‘, simple , absolute and ultimate to know about it. There is nothing limiting the theory of Globalization in a sense so far so good in India since it is a form of development from India or elsewhere. As the theory proliferates, it is not uncommon to see its

impact everywhere and revamp domestic form should experience indicate the lack in it and hence, the need for Globalization.

3. AIMS & OBJECTIVES

For human mind, there has always been a confrontational field of hard luck or the so-called endeavour. In the new and expanding domain of globalism, Trainers have already emerged from among the global public comprising locals, citizens, non-residents and inter-national community. So much said and written on Globalization out of reforms and rejuvenations of calculated courses of action. Priorities of personalities clashed with the attractions of statistics and judgements of preferences. A working knowledge of Politics, Science and War came to influence the results. New thesis on Globalization which is complete per se as a doctrine is the need of the hour.

Such thesis enables individual Nations become international masters in operational globalism through mere globalization of themselves and the road-map to globalism is laid down.

An academic Doctor gets guided by experience and commonsense. Modern knowledges are evolving so fast that the experience is not acquired or available to acquire. There is hardly any area of human enterprise which does not look for it, to get benefit out of it, i.e., globalization for globalism.

4. MATERIALS & METHODS

The material is the reference materials like Journals on Globalization, The Economic Times, The Business Times, topical Books on Globalization with related survey of Articles on Globalization, Commerce, Economics, Banking & Finance Management and Public Policy on international understanding. A wide browsing of the internet websites to look into thousands of pages of material that has been made available free of cost for referencing to and pinpointing of importance of minor and major aspects of Globalization for Globalism in multiples of researched concepts and central ideas facilitated by various search engines to easily access on the worldwide websites with the uniqueness of different search engines contributing to different sets and groups of titles on literature on Globalization. Also, available on the internet are foreign and international Universities sponsored sites of Globalization Journals leading to novel and renewed philosophies on Globalism in its original historical and evolved contexts.

The methods are reading, understanding and digesting to summarizing the new ideas and theories.

5. EXPECTED RESULTS / OUTCOMES

Firstly, there will be the Researched and informative facts in the form of specialized Articles /Papers in Research Journals on Globalization conclusively achieved.

Secondly, interdisciplinary & multidisciplinary effect-driven proven research findings with databank help push up Globalization expeditiously.

Thirdly, Research with research findings when presented, such presentations will be the

guidelines to last as research highlights at the research seminars on researched aspects of truths /fallacies/ illusions.

Following the above three is the aftermath that their exposure to getting published openly and whenever needed allowed to go on air as broadcasts for popular shows & feedback.

A major anticipated outcome would be that of Globalization for world economic, monetary and commercial norms and order of solidarity or what may also be called Oneness universally as opposed to unity in diversity prevailing in the present all over the world.

6. REFERENCE

The following national and international Bodies comprise the References for research work on Globalization for Globalism.

The United Nations Organisation

The World Bank

The World Trade Organisation

The Reserve / Central Banking Organisation of the Nations

The Bank for International Settlements

A sample of population of Banks worldwide, for example, listed hereunder

1. The Alpha Bank, Greece
2. The Lippo Bank, Indonesia
3. The State Bank of India
4. The Oesterreichische Kontroll Bank of Austria
5. The Institutes of Bank Management
6. The Banking Associations of Banks
7. The Industrial & Agricultural Banking & Finance Infrastructures.

g. The National and International Bodies' presence through their respective Reportage/ Journals from time to time collected such as might be the below

1. World Affairs: A Journal for International Issues
2. Economic & Political Research Foundations in Western World
3. The Banking & Finance Journals

7. EXPERIMENTAL DESIGN/MODELLED SIMULATORS

Globalism is all-pervading. Internationalism is shadowed by neighbourhoods. Nations understanding this are less intra-national. Nationalism is but a waning gradualism in the current century.

Education and Knowledge are emerging universally. Medical Sciences, Engineering, Technology, Space Exploration, Atomic Energy, Oceanography and Environmental Studies are not only symbolic of Globalism but also globalism emergence per se

The globalism realities have already established themselves successfully as operational experimental designs of Global Peace, Global Economics, Global Education, Global Health, Global Justice and last but not least important, the Global Law & Order. The modelled simulators thereof respectively are the well-revered the United Nations Organisation (UNO), the International Monetary Fund (IMF), the University of United Nations (UUN), the World Health Organisation (WHO),

the International Court of Justice(ICJ) and the Interpole which are welcomed without enemies and opposition to Globalism besides being standards of globalization for globalism diluting the elementary concept of unity in diversity represented by differential and divergence-captive geographical Sovereignities The Trade, Commerce and Industry on the Surface , Air and Space in addition to that of the underworlds of the Earth and Sea has benefited the mankind in all walks of humanity: civil & military, from

personal savings to National Geographical Interests. This is enabled by multifaceted Banking –Agricultural, Commercial, Industrial, Investment and Merchant Banking activities networking the Countries across the Globe. The World Trade Organisation (WTO) with the World Bank (WB) thus constituted Banking Globalism. Hence the globalization for globalism.

Every thoughtful Research Product/ Thesis may carry along with it an essential but not necessary byproduct’ in theory or practice at times. This exactly happened all along my effort above to writing the Thesis in a fruitful manner which culminated into a virtual byproduct running across my mind auto-suggesting a sub-title for the byproduct which I called ‘could be another Research Paper ‘ to publish separately under the title of “ Zero-base Review of the Globalization Zeitgeist“. But, I decided to include and attach the byproduct in and to this main Product at once so that a moral basis for the entire Research Thesis will have been established comprehensively in the first reading by a vivid reader. Read further the byproduct.

Zero-base Review of the Globalization Zeitgeist:---

There are references in the World and in political speeches to the term zero- base. This term implies that a review should be carried out from scratch, not from the familiar instead. Such review requires more time and effort than the normal. However, it is arguable whether there is truly such a thing as a zero-base review of Globalization in its zeitgeist .

This Global World of ours is not an unreasonable World; nor even that it is a reasonable one. The frequent reaction is that it is nearly reasonable but not quite. The World is not a locality illogical but a cover for logicians. It looks just a little more mathematical and regular than it is. Its significance has more relevance than facts would justify. It is something that outstanding Executives at the helm of affairs have in common with gifted military Commanders, brilliant economic Planners and mighty Judges winning over intellectual

human beings while getting things accomplished for populations and by statistics for variously different purposes and applications. This is so in crucial situations of managing with incomplete numbers and partial evidences to keep the World going .

The World political parties and the World public opinion constitute the World activity on this Globe of anarchism, individualism, socialism (forms like Utopian and Fabian), Marxism, democratic Socialism, communism, syndicalism, guild socialism, fascism, Gandhism, Gandhi's ideal society, Gandhism compared with Marxism, Maoism & Naxalism, industrial revolutions, Dialectical materialism, materialism conception of history, class struggles, theory of surplus value, value-addition theory of revolution, agricultural revolution, population growth risks & controls, Lenin's contribution to Marxism, International peace organizations like the League of Nations & the UNO, political thinkers' themes in principle & manifestos, local peace committees and of late, terrorism. These features are all-in-one solidified World of geographically scattered Natural Resources and therefore , no Country of today can afford to think of itself as an entity leaving alone the feeling of its endangered well-being as an economic entity, in the midst of so many surrounded haves and have- nots.

A wide variety of circumstances all over the Globe are pointers to the boundaries of Psychologies and Sociologies of Nations from times immemorial. Combined and called the boundaries of Social Psychologies, these are not entirely amenable to reason and also unclear to explain the Globalization zeitgeist without knowing the underlying and hidden pro-active tendencies and achievements already time-tabled by the History in the recent past as Globalization indeed. A few Economists and Social Psychologists have indeed been working to thwart the mistaken beliefs in the real life World by giving weightage to the zeitgeist (of Globalization) enabled by the cooperation of business firms such that no amount of nationalization could make achievements equal in scope and satisfaction to

those of Globalization. This is also testified by time as centuries rolled by. In any form and in all forms or by any mean and by all means, without the prior oral or written permissions of Nations, Globalization for Globalism has made its presence felt. Globalization and its products dominated the national and global markets favoured by the private fervor of yester-year nationalists. The difference has become visibly tangible and an open mind to Globalization with gateways, highways, airways and red-carpet corridors, all for globalised world activity and systems has prevailed for the last three centuries. According to the Senior Social Anthropologist, Advisor & John Dewey Professor of the New School University, New York in America for Social Sciences and Global Initiatives, Dr. A. Arjun , it has been

>>>>> Dr. Arjun Appadurai, World Renowned Expert. explored that the nation-state is not an absolute decree in the World History from 200 years back. Globalization is an outlook of the consolidation of essential sectors of economical, educational, industrial, marketing, commercial, scientific, information and social sectors. The 200-years age of the nation-state is counter-confirmed by Dr. Michael E. Porter of the Harvard Business School, who established himself as the World's leading Authority on Competitive Strategy & Advantage by successfully exploring and balancing the 200-years old concept of comparative advantage in the economic analysis of international competitiveness .

>>>>>>> Dr. Michael E. Porter, Harvard Business school, He also studied and

certified that national competitive advantage from the patterns of industry success, company strategies and national policies for advance and decline of entire national economies, disclosed that global competition resulted in the end paving the way to Globalization and hence, policy-makers being the global citizens of 21st Century embraced globalization for globalism. This might be, according to this Paper of mine, described as the global ideology formation

Hundreds of Scholars have studied the nature, causes and purposes of different approaches to nationdoms on which they deem global competition has had its main dependence. The most frequent dimension of approaches is based on the dimension of History but events clearly recognizable as Wars have taken place throughout the recorded History with impact on Civil Society powerful enough that the use of armed forces compelled human thinking. To purze the international community's systems of war-readiness, Globalization for globalism is the law of survival-medicine in an immediate sense to divert aggressive instincts and geographical acts and wars of cultural independence. It is virtual globalization in sight and the vision is globalization for globalism without barriers in business, economy, markets, security and science & technology. Studies on Global warming and Ozone layer protection from atmospheric pollution, the cloning of genes and the stem cell research are advancements with observers knowing well the onset of globalization with all its presents and boons. That is aptly described as the Globalization in its zeitgeist.

Author Profile

Dr. ROJUKURTHI SUDHAKAR RAO, A Returning Scholar to self-directed Research in Graph Theory & Applied, his Pre-Ph.D Course with Examination in the field of Graph Theory at the Andhra University, Andhra Pradesh State , in the year of 1981 at the Department of Applied Mathematics. Due to financial difficulties on the domestic front, the author joined the Dena Bank for pay-scale career as Officer of Banking Statistics in Junior Management in the same year at Bombay, Maharashtra State, relinquishing the research -career-prospects in teaching line jobs . The interest in Graph Theory & Applied Research prevails. To his credit, the Author has so far published six Research Papers in International Journals of Science & Technology.
